PROJECTS

Online Hotel Booking System

The project's objective was to create a robust online platform to streamline and enhance the efficiency of hotel booking operations

- Employed HTML, CSS, and JavaScript for the frontend, while utilizing PHP with MySQL for the backend.
- Effectively developed an operational online hotel booking system that optimizes the reservation process and efficiently manages inventory.
- Accumulated valuable expertise in web development, database administration, and e-commerce functionalities through the implementation of an online hotel booking system.
